

DRIVING
WOOD
TRANSFORMATION™

ALWAYS AVAILABLE. ON TIME.

Sales and operations planning (S&OP) is the equivalent of an airport's control tower for your hardwood mill(s). It's where directions and priorities come from. It's essential to sticking the landing—every time.

PMP WESCHEDULE™ (part of PMP TEAMMATE™) is the result of over 15 years working with more than 100 mills to flawlessly orchestrate sales and operations so that you can consistently deliver the right quality products at the right time to your customers.

Like everything we make, PMP WESCHEDULE is specifically designed for the unique needs of the wood transformation industry. With all the sawdust on our boots, we understand that mills don't operate the same as other manufacturing installations.

BENEFITS

- Ensure kiln availability and optimal performance
- Consistently meet product delivery dates
- Improve rough lumber supply planning
- Better forecast sales and be more agile when you get last-minute orders
- Spend less time planning
- Optimize your supply chain
- Measure the impacts of equipment availability on the supply chain
- Fewer corrective actions to meet sales promises such as unplanned production run changes
- Give a concise overall view of sawing, drying, molding, varnishing, etc. operations to everyone

FEATURES

- End-to-end operational overview
- Inventory forecasts
- Easy work order prioritizing
- Varnishing scheduler
- Kiln scheduler
- Drying, varnishing, etc. recipe editor
- Alerts when estimated shipping dates deviate from planning
- Part of PMP TEAMMATE, our mill OS

ENSURE KILN AVAILABILITY AND OPTIMAL PERFORMANCE

PMP WESCHEDULE is designed to efficiently manage your kilns so that they are available when you need them to be and always offering peak performance for the products to be dried. This guarantees quality lumber, just in time, all the time.

CONSISTENTLY MEET PRODUCT DELIVERY DATES

Orders for specialty products don't always come in at regular intervals or consistent volumes. When they do come in, they always place a stress on operations. PMP WESCHEDULE offers the flexibility to quickly reorganize production planning and work orders in such a way that you don't disrupt your entire supply chain. Our software also allows you to accurately estimate sales order completion dates, which makes shipping much easier. All this enables the mill to dependably deliver on your sales promises and reduce such overhead as overtime.

IMPROVE SALES FORECASTS AND AGILITY

Having a thorough understanding of what's in inventory and production gives your sales team the agility to seize unexpected opportunities as they arise—without completely disrupting the entire production schedule. PMP WESCHEDULE is designed to help minimize the number of corrective actions necessary when you unexpectedly have to modify a production run, which also limits disruptions. The software eliminates most of the need for frequent adjustments to product planning by taking inventory and sales orders into account, improving vertical communication within the mill and your ability to deliver on time.

Being able to turn on a dime affords you the flexibility to have a wider product offering, while maintaining a stellar sales record.

END-TO-END OPERATIONAL VIEW

Having a self-contained overview of every step in your manufacturing process—over the time span that matters—gives every stakeholder in your business the necessary information to understand what's in the pipe.

PMP WeSCHEDULE is more than a simple planning tool. It pools information from your entire S&OP chain to give you the control and agility you need to always deliver on time.

This dashboard, available to everyone with access, displays the current sawing, drying, molding, and varnishing operational overview. You can adjust the timeline from hourly to quarterly for a granular to a bird's-eye view.

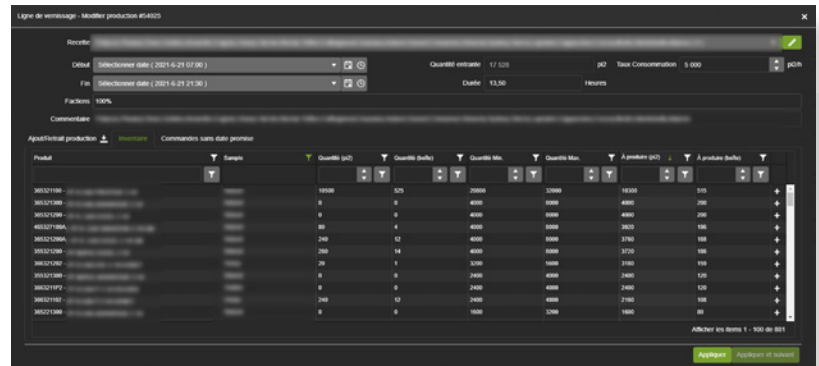

Scheduling is based on capacity to maximize throughput instead of a kanban pull flow.

With accurate inventories that account for sales and production, you always know what's available for more flexibility over your supply chain. It also enables you to anticipate raw material purchases so as not to prevent order fulfillment.

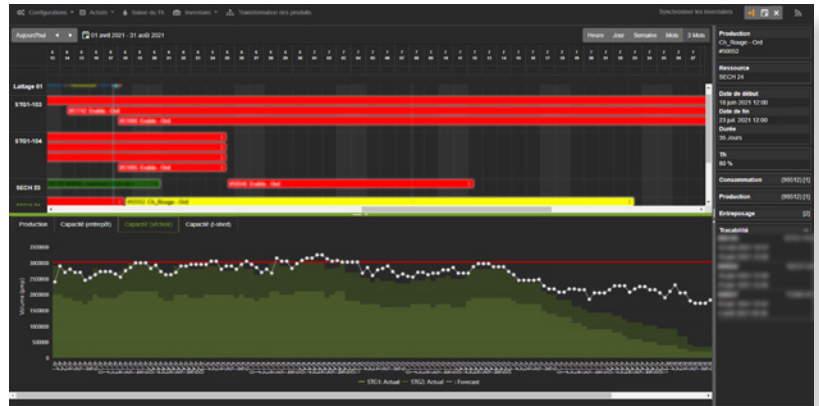

With PMP WESCHEDULE it's easy to set the priority of work orders within recipes for a selected time frame in only a few clicks.

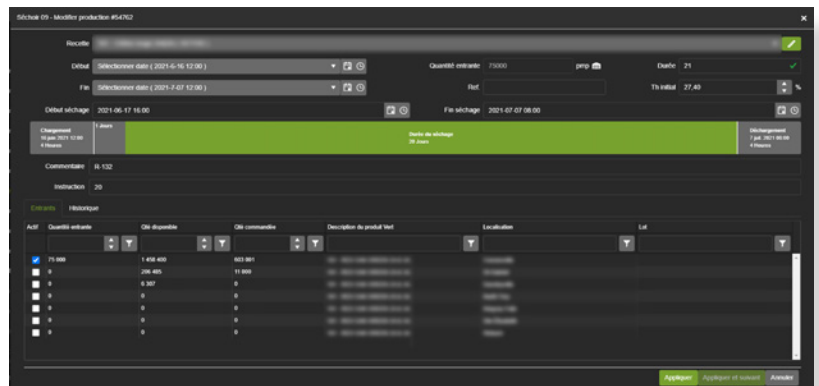

VARNISHING SCHEDULER

Quickly and easily manage your varnishing line's schedule with our intuitive interface.

DRYING RULE EDITOR

A few clicks is all you need to define all your drying rules according to your kilns, recipes, schedule, and more.

GO BEYOND CONVENTIONAL REPORTING— PUT YOUR DATA TO WORK

PMP TEAMMATE™ is a complete solution for your business—whether it's a single or multiple-mill operation.
